Subject: Treasure Island Naval Station Info.
Attachments: F_TI_SMP_2014_122314 Table 1.pdf; TI_201111_FactSheet_EnvCleanupProgram_Vol06.pdf

Thank you for your inquiry on Treasure Island Naval Station. Remedial Investigation Reports for the various sites will document the levels of contaminants found, and the potential health risks associated with the contaminants. However, these are all very large technical documents. For shorter summary reports, the Navy has developed fact sheets for the public. I recommend that you contact Keith Forman at the Navy directly to see which fact sheets might be available to assist you more specifically. He can be reached at 619-532-0913, keith.s.forman@navy.mil

You may also search for fact sheet information as well as technical documentation on-line at the following website:

http://www.bracpmo.navy.mil/brac_bases/california/former_ns_treasure_island/documents2.html

Per our discussion, attached is a table from the Final 2014 Site Management Plan summarizing the various contaminated sites under investigation and/or cleanup by the Navy. The complete document is available at the website link above. Also attached is a sitewide update fact sheet from 2011. Please let me know if you have further questions.

Nadia Hollan Burke, Environmental Engineer
